

TITLE **SPECIFIC CORPORATE POLICY ON ENVIRONMENTAL PROTECTION AND RADIOLOGICAL SAFETY**

PURPOSE The overall objective is to promote the continuous improvement of environmental performance, to ensure radiological safety, to comply with the obligations resulting from the applicable authorizations and legal requirements and to implement high performance technologies in order to prevent environmental pollution and to maintain a clean environment.

APPLICATION REQUIREMENTS All SNN Group company officers

- The executive management of SNN Group companies formulates and undertakes a commitment regarding the environmental protection and continuous improvement of environmental performance;
- Environmental protection and radiological safety policies are established (as separate documents or as an integral part of documents presenting organizational policies and principles) aligned with SNN Policies; at SNN Group level these policies are implemented in a uniform manner;
- The environmental and radiological safety objectives and targets are established so as to provide the level of protection required by the legal regulations in force, being reviewed and adapted according to their evolution and the interests of the companies of the SNN Group, in order to continuously improve performance;
- The necessary measures to ensure the supervision of radiological safety and environmental protection are taken;
- Compliance with the requirements and conditions imposed by the authorizations issued by the environmental and nuclear regulatory authorities is maintained;
- Developments in legislative and regulatory requirements in the field of environmental protection and radiological safety are identified and monitored to ensure continued compliance;
- The management and handling of non-radioactive, radioactive waste, including spent nuclear fuel, if applicable, are organized in compliance with all applicable legal requirements;
- Regular reports, minutes and information on radiological safety and environmental protection, including regular reports on radioactive waste management and handling are produced;
- The responsible staff from the companies of the SNN Group, designated by their management, participates in the quarterly meetings of the Environmental Protection and Radiological Safety Collective (CPMSR) organized at the SNN Head Office level and prepares the required reports on radiological safety and environmental protection, including aspects related to authorization;
- The designated representatives of the DSN-SNN Head Office are invited to attend the meetings on environmental protection and radiological safety issues organized within the SNN Group companies, as observers.
